Technical details

| | |
|---------------------------------|--|
| External dimensions (H x W x D) | mm x mm x mm |
| Internal dimensions (H x W x D) | mm x mm x mm |
| Weight | 3 kg |
| Article number | HDL MF 65 V102 |
| Construction | included (apart from the lock): proximity cards and programmer, additionally: audit device, power switch, software |
| Colour | silver |
| Lock | steel structure, high resistance to breaking and other mechanical damage |
| Features of the lock | 5-locking, with alarm, surface covered with anti-corrosion layer |
| Emergency opening option | emergency key |
| Lock memory | 456 operations |
| Low battery alarm | yes |
| Variant | external right |
| Equipment/Operation | <ul style="list-style-type: none">- complete and autonomous locking system, - fire resistance certificates EI30 and EI45 of the Building Research Institute, - powered by AA batteries, - lock memory: up to 414 last operations, including use of emergency key, possible to increase the number of operations stored according to customer needs- useful functions of the auditing device with a built-in clock and date stamp, e.g. list of recent operations, checking of basic data stored in the lock, - creation of different paths and access levels (card programmer), - connection of the lock system with a computer via USB, - savings in energy costs through the use of intelligent power switch (optional), - easy-to-use hotel management system software with control of doors and cards, - programming of the locks is possible using both the auditing device and the cards themselves |
