Technical details

External dimensions (H x W x D)	mm × mm × mm
Internal dimensions (H x W x D)	mm × mm × mm
Weight	3 kg
Article number	HDL MF 65 V104
Construction	included (apart from the lock): proximity cards and programmer, additionally: audit device, power switch, software
Colour	gold
Lock	steel structure, high resistance to breaking and other mechanical damage
Features of the lock	5-locking, with alarm, surface covered with anti-corrosion layer
Emergency opening option	emergency key
Lock memory	456 oerations
Low battery alarm	yes
Variant	internal right
Equipment/Operation	- complete and autonomous locking system, - fire resistance certificates EI30 and EI45 of the Building Research Institute, - powered by AA batteries, - lock memory: up to 414 last operations, including use of emergency key, possible to increase the number of operations stored according to customer needs - useful functions of the auditing device with a built-in clock and date stamp, e.g. list of recent operations, checking of basic data stored in the lock, - creation of different paths and access levels (card programmer), - connection of the lock system with a computer via USB, - savings in energy costs through the use of intelligent power switch (optional), - easy-to-use hotel management system software with control of doors and cards, - programming of the locks is possible using both the auditing device and the cards themselves
